### DevTinder 🔗

- Full Stack Web Application | MERN Stack | JWT | REST API
- Developed a **developer matching platform** where users can **connect, send/accept/reject connection requests**, and **view developer feeds**.
- **Backend:**
  - Created RESTful APIs using **Node.js and Express.js** with **MongoDB** as the database.
  - Implemented **user authentication and authorization** using **JWT**.
  - Built API features for **Signup, Login, Sending Requests, Accepting/Rejecting/Ignoring Requests**, and **Developer Feed** to discover new profiles.
- **Frontend:**
  - Built using **ReactJS** with **Axios** for API integration.
  - Implemented **user registration, login**, and **interactive dashboard** showing developer profiles and request statuses.
  - Focused on **secure user data handling, role-based functionalities**, and **clean UI/UX**.

### Store Rating App 🔗

- Full Stack Web Application | React.js | Node.js | PostgreSQL | Prisma | JWT
- Built a full-stack web app where **users can rate stores** and **store owners can view ratings**.
  - **Backend:**
    - Developed REST APIs using **Node.js, Express.js, and Prisma ORM** with **PostgreSQL**.
    - Implemented **JWT-based authentication** for both users and store owners.
    - Created APIs for **Login, Signup**, and **rating submission**.
    - Defined Prisma schema with **User, Store**, and **Rating** models.
  - **Frontend:**
    - Designed **Login, Signup**, and **Dashboard** pages for both users and store owners using **ReactJS**.
    - **User Dashboard:** List and rate stores.
    - **Store Owner Dashboard:** View user ratings for their store.
    - Focused on **clean code, API security**, and **role-based dashboard UI**.
